**DETAILED ACTION**

1. The election with traverse filed May 28, 2002 in Paper No. 12 is acknowledged.
2. The amendment filed May 28, 2002 in Paper No. 12 is acknowledged and has been entered. Claims 1-31 have been canceled. Claims 32-47 have been added.
3. Claims 32-47 are pending in the application and are currently subject to an election requirement.

***Election/Restrictions***

4. Restriction to one of the following inventions is required under 35 U.S.C. 121:  
  
Group I. Claims 32-43, drawn to a method for diagnosing colorectal cancer, classified in class 435, subclass 6.  
  
Group II. Claims 44-47, drawn to a method for determining the prognosis of an individual with colorectal cancer, classified in class 435, subclass 6.
5. The inventions are distinct, each from the other because of the following reasons:  
  
The inventions in groups I and II are disclosed as materially different methods that differ at least in objectives, method steps, reagents and/or doses and/or schedules used, response variables, assays for end products and/or results, and criteria for success and therefore, the claimed methods are distinct.
6. Because these inventions are distinct for the reasons given above and also because the search required for any one group is not required for any other group and/or the inventions have acquired a separate status in the art as shown by their different classification or their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Art Unit: 1642

7. Groups I and II are further subject to an election requirement.

Claims 32 and 44 are generic to a plurality of disclosed patentably distinct species comprising the method wherein (a) said expression is measured using a labeled nucleic acid probe and (b) said expression is measured utilizing a biochip. Applicant is required under 35 U.S.C. § 121 to elect a single disclosed species, i.e., (a) or (b), even though this requirement is traversed.

8. Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

9. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

10. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
